

# Quiz plug-in

Whether it's fire protection instruction or data protection information – knowledge transfer has never been so much fun! Employees can learn in a playful way – with a quiz.

## Functionality

The Quiz plug-in from T-Systems MMS offers easy-to-create questions, each with up to four possible answers and publishing options. Participants are shown their score along with individual feedback at the end of the quiz. The answers can be exported centrally using a CSV file. Content can also be created in multiple languages.

## Use case

Do you really know what you're talking about? The Quiz plug-in offers an exciting change to the everyday routine – whether as a guessing game during an event, to get employees involved, or as a classic competition, e.g. for seasonal events such as Christmas. The quiz is also an ideal knowledge-check tool, for example after a completed training session or successful onboarding.

## Availability & price

The Quiz plug-in is available for both the COYO Cloud and COYO Private Cloud as of V37 and is priced (based on the license model) from €3,400/ per year.

## Five steps to the Quiz plug-in

- Getting in contact with COYO
- Presentation of the Quiz plug-in
- Contract and terms of use
- Obtaining the manifest URL
- Installation and integration
